NEW LEASE OPTIONS:

TEMPOHOUSING NOW OFFERS LEASE OPPORTUNITIES FOR THE MODULAR HOMES AND HOTEL ROOMS, STARTING AT ONLY 99 EURO PER MONTH

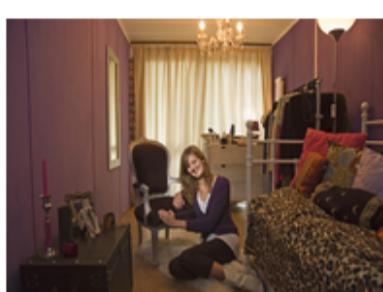

Two models

Two different models of the modular homes of Tempohousing are now available on a rental basis. With rental prices starting at 99 Euro per month, great opportunities are now open for entrepreneurs finding it difficult to arrange funding or with temporary housing projects.

Professor model

One model is the well known "Professor model", which has become very popular as a student home (1 or 2 rooms in one ISO container) worldwide.

Junior model

The other model is the square size hotel room model "Junior" (4,8 x 4,8mtr), that can be marketed as 3 star** luxury in most markets. For rental contracts for 50 units or more, Tempohousing offers free design services to support the local construction works that are necessary to turn the individual models into a complete and operational hotel building.

Limited time

Contact us now for the terms and conditions for leasing our homes and hotel rooms. As this offer applies only for a limited quantity, do not wait too long!

New Tempohousing office opens in Sion, Switzerland

Guillaume Moulin, born in Switzerland and with a strong track record in the real estate business both in Europe and in the Far East, will lead our new office in Sion that opened on May 1 this year. His contact details can be found on the Tempohousing website. The construction industry in Switzerland is facing increasing prices for traditional housing solutions and the Tempohousing system with quick, flexible and affordable solutions will certainly find its way in the market for studenthousing and hotel projects, where construction cost and delivery speed are essential.

A warm welcome for Guillaume and his team and no doubt we will soon be hearing more from Switzerland.

The Servotel in Port-a-Prince, Haiti is nearing completion!

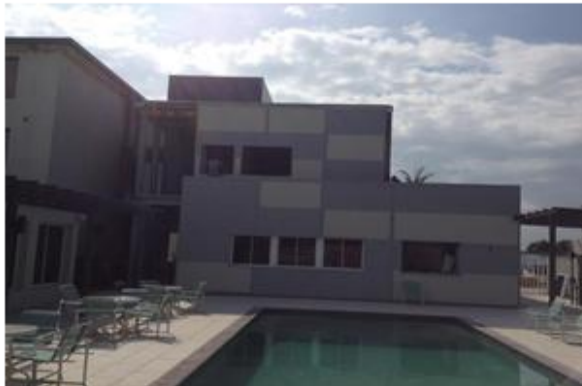

The Tempohousing prefab rooms in the hotel already are in use and available for [booking](#).

As can be seen on the Servotel [Facebook page](#) there is quite some progress in finishing the common areas of the hotel. A temporary reception building is now in use for the main hotel facilities, as well as the outdoor pool, ready for a refreshing swim.

Also check their website: www.servotelhaiti.com.

Tempohousing congratulates the Servotel management with the achieved results so far and hopes this adds to rebuilding Haiti.

Tempohousing frequently sends a newsletter to its subscribers by e-mail with information on new projects, products or developments. Do you want to receive our newsletters in the future? Subscribe on our website. In case you don't wish to receive our newsletter anymore please click the link on the bottom of this e-mail.
