MAY WE HAVE YOUR VOTE PLEASE?

Choose your favorite design

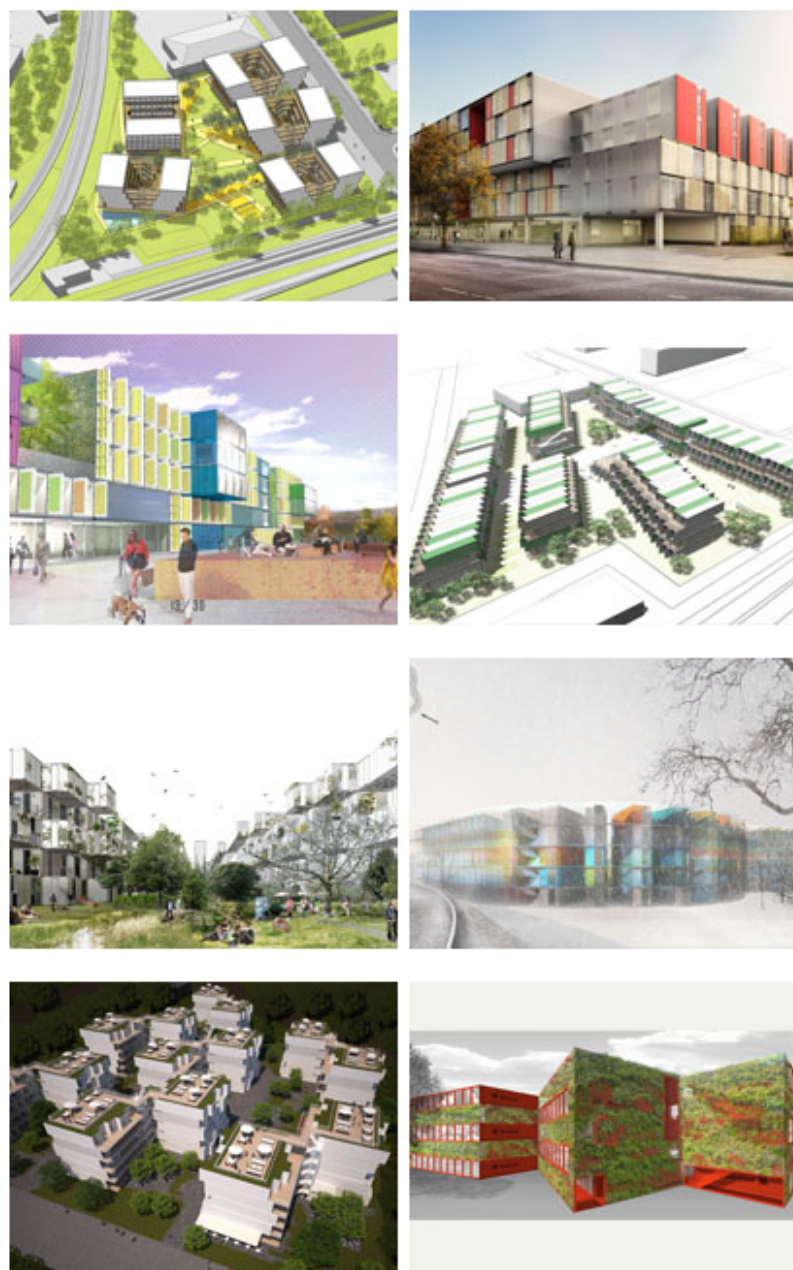

Tempohousing is part of the development team for an exciting new shipping container village in Berlin. The developer, [Estag](#), has invited architects from all over the world to join a competition to design a world class dormitory that meets all expectations from students nowadays: affordable, spacious, sustainable and above all: great atmosphere with a classy design. The architects have come up with fantastic ideas and they can all be viewed on the Facebook page: [click here](#).

Your vote counts!

Help us to choose the best idea and leave behind your preference on the Facebook page.

You can choose from these projects: that made it to the short list

Tempohousing supplies housing for temporary shelter Brighton (UK)

A safe and warm home is what most of us take for 'granted' but in many cities still some people have to live without this comfort. In Brighton (UK), local developer QED Properties has offered to the city council to quickly build and rent out a temporary shelter, working together with Tempohousing to provide the prefabricated units. BBC already reported on this smart initiative, see the footage here: [Youtube link](#). The shelter is expected to open in August 2013. The Tempohousing units for this shelter are new accommodations built in Amsterdam, based on used 40 ft containers.

Interior example of a previous TH project.

Staff accommodation project in Lagos, Nigeria

Tempohousing Nigeria has been contracted to build staff accommodation for an indigenous Oil and Gas firm for their pipeline construction project.

Local modular construction

The units will be built in Lagos, and transported to the Niger Delta, the heart of Nigeria's oil and gas activities. The camp will provide a high quality housing, office & convenience facilities and bespoke furniture for 80 field workers and managers.

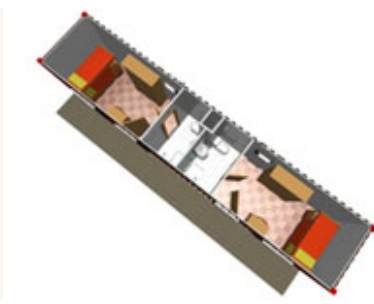

Being located in a remote area, the shipping container solution of Tempohousing turned out to be the ideal solution the customer, that was seeking an economic and flexible system that also can be relocated in a simple way.
